⚜ Courses

Java developer, Tops Technology
Feb2023-july2023
Web development Bootcamp, Udemy
August 2023-Present

★ Project

Online vegetable/fruit Website

June 2023-July 2023
Made a wonderful real time website with jdbc which consists of two different section i.e Buyer and Seller side. These project consists of login page as well as forgot password. The seller can add product which he want to sell, while buyers can see these on there side. Connected it with database php myadmin and did payment integratioin with razor pay.
